I booked a retreat with Alain in 2018, I somehow wanted to go there without knowing why. Something pulled me. So I ended up in a paradise. Nature, nature, nature, an own veggie garden, simple life but very relaxing and grounding. Nature walks, night walks, meditations, acupuncture, yoga, deep talks, healthy food. A complete healing package and I wish I could have stayed longer than one week (no, its not a vacation, its much more).

Some months later I had an accident and hurt my back very badly, followed by a complicated operation. I was so much in pain like never before, although I took morphium. Alain found out that I was suffering and offered 3 energy healing sessions via phone. It was amazing - I couldn't get out of bed on my own, I couldn't breathe properly, I couldn't walk. After our first session I had almost no pains for some hours, I was suddenly able to breathe and the next day I went for my first walk since my accident. It was like I jumped some weeks in my healing path. And after every of the next two sessions I felt much better.

If you are either "in search", or you are in pain and need help: I can deeply recommend Alain and his methods.
